

MEDIA ALERT

PROACTIVE COMMUNICATIONS DEMONSTRATES NEW TECHNOLOGIES AT TEXAS HOMELAND SECURITY CONFERENCE (San Antonio, TX; Dec. 3-5)

WHO: Proactive Communications, Inc. (PCI)

WHAT: PCI's booth (# 628/529) will feature demonstrations of broadband simulation via SPaRTAN, a suburban vehicle configured that provides secure satellite communications on the move for wartime and natural disaster environments.

PCI's technology is currently being used by the US Army and the Iraqi Ministry of the Interior to manage all secure communications for military and security personnel in Iraq.

Demo Features Include:

- Rich full motion video teleconferencing back from the vehicle to the SPaRTAN
- Toll quality voice over IP calls to on-sight HUMMER, Iraq/Afghanistan and PCI's office in Killeen, TX
- Cell phone calls both encrypted and unencrypted
- Land mobile radio calls
- Unmanned Surveillance camera operations

SPaRTAN

PCI's Satellite-Enabled HUMMER

WHEN: December 3 – 5 (Monday – Wednesday), 2007

WHERE: Texas Homeland Security Conference
[Hall C, H.B. Gonzales Convention Center](#)
San Antonio, TX
Booth # 628/529
